responsibility
Our mission is to ensure that Cincinnati Public Schools students participate in activities beyond the classroom that help them develop the skills they need to succeed in life.
From opportunity comes leadership

According to numerous studies, these are just some of the skills that children learn by participating in extracurricular activities. In addition, they receive supervision, guidance, and direction from mentors and coaches who are often with them over many years, not just one semester or one school year.

But consider this: in CPS, 80% of the children live at or below the federal poverty level. For parents of these children, keeping a roof over their heads and feeding their kids is a daily struggle. Forget about anything extra like sports or enrichment activities. Those things are simply out of reach for 80% of the families in Cincinnati Public Schools.

That’s where Activities Beyond the Classroom comes in. During the 2017-2018 school year, we provided nearly 200 extracurricular and enrichment activities to over 15,000 children in Cincinnati Public Schools — at NO COST to the students.

Why? Because we believe poverty should not be a barrier to success, and every child deserves the opportunity to learn the skills that help them succeed in school — and in life.

We sincerely thank you for your support during the 2017-2018 school year. We look forward to working with you in the coming years as we strive towards our goal of providing extracurricular and enrichment programming to EVERY Cincinnati Public School student.

Dick Friedman
President, Board of Trustees

ABC’s impact through the years

From athletics to activities

The year was 2004, and for a variety of reasons, the landscape for extracurricular activities throughout Cincinnati Public Schools was bleak.

In most suburban schools, the answer would be simple: families form a booster club and raise money to offset the costs. However, for many CPS families, money was limited and booster clubs weren’t an option.

For this reason a few committed individuals came together with the belief that no child should be without these life-shaping extracurricular experiences. Thanks to their efforts, and a one-time anonymous $80,000 donation, a districtwide booster club known as Student Activities Foundation (now Activities Beyond the Classroom) was born.

The organization evolved over the years, and while it still functions as a districtwide booster club, ABC also manages dozens of extracurricular programs in arts, music, foreign languages, and more. The ultimate goal is to ensure that ALL extracurricular activities remain a vital part of the CPS school experience.

2004
One anonymous $80,000 donation to create a districtwide booster club led to the formation of Activities Beyond the Classroom (then Student Activities Foundation).

2005
Entered into an agreement with CPS to take over management of Stargel Stadium.

2007
Secured funding, including $200,000 from the Bengals/NFL, to develop a new athletic field at Withrow High School.

2011
Entered into a contract with CPS to manage the high school and junior high Extracurricular/Athletic Directors and their budgets.

2012
Began creating and managing programs outside of grades 7-12 athletics, including arts enrichment, the AAA School Safety Patrol, martial arts, youth tennis, 21st Century Community Learning Centers, and Community Connectors mentoring programs.
2013
Changed the organization’s name to Activities Beyond the Classroom to more accurately reflect its expanded programming.

2014
Secured an Impact 100 grant to turn an abandoned building into an all-sports athletic facility, The Mack, at Hughes High School.

2015
Created a youth soccer program specifically aimed at girls in elementary school.

2017
Launched ABC Clubs, no-cost, customized afterschool enrichment programming, at three elementary schools.

2018
Entered into a contract with CPS to manage two additional Resource Coordinators, bringing the total to eight.
Secured funding, including $250,000 from the Bengals/NFL, to develop a new athletic field at South Avondale Elementary School. (Construction begins 2019).

“Extracurricular activities instill the skills and values that matter most for upward mobility.”

Voices in Urban Education
At ABC, our mantra is “see a need, fill a need,” and over the years, that’s exactly what we’ve done. Whenever we uncover a need — whether for one child, one student, or the entire district — we roll up our sleeves and figure out a way to help.

2017-2018 was no different. At the beginning of the year, we launched ABC Clubs, no-cost afterschool enrichment programming, at three elementary schools. We also added a Swimming for Safety program at Taft Elementary, and a Steer Clear drug & alcohol prevention education program to middle school children throughout the district. We also stepped up as the lead funding agency to replace the dilapidated field at South Avondale Elementary with a new, state-of-the-art turf field.

ABC Clubs

ABC Clubs are no-cost afterschool programs designed to enrich the lives of students and families by providing a fun, safe environment for children at the elementary school level. Schools choose from a menu of activities, including cooking, sewing, gardening, yoga, opera, photography, sign language, and more. The Clubs launched in 2017-2018 and have been a resounding success.

Swimming for Safety

Launched in 2017-2018, this program at Taft Elementary teaches young children basic swimming skills. In this six-week 12-session program, kindergarteners learn how to tread water, identify the side of the pool, and safely dog paddle to the side and exit the pool.

Mandarin Chinese

Born out of a desire to help the children of Cincinnati broaden their horizons, the Early Learning Mandarin Chinese Language Adventure, an afterschool program at Frederick Douglass Elementary School, teaches children in grades K-2 the basics of China’s most popular language. During its 19-week session, children learn how to say numbers, colors and animals in Mandarin Chinese. They also receive an online bilingual subscription that allows them to expand on the knowledge they gain in class.

Steer Clear

Steer Clear is a highly effective educational program focused on the prevention of drug and alcohol abuse. Launched in 2017-2018 and delivered to over 1,100 5th-8th grade students during the year, the goal is to schedule five 45-60 minute sessions to each participating student. Pre- and post-tests from the year revealed a 61% increase in knowledge about drug and alcohol use among the students who participated in the sessions.

Youth Soccer

Only a few years ago, with rare athletic opportunities available at the elementary level, girls weren’t gaining the skills and confidence to try out for sports at the junior high level. To remedy this, ABC started a soccer program for girls. Eventually the program expanded to include boys as well, and in 2017-2018, 500 girls and boys at 31 schools played soccer in fall and spring sessions.

Martial Arts

ABC’s Martial Arts program, delivered in three elementary schools, focuses on the core principals of respect and discipline. The expert teachers provide a balance of martial arts techniques focusing on the physical and mental training that comes along with these skills. In 2017-2018, 40 children participated for a full year at no cost to their families.
United in partnership

ABC and CPS began their partnership in 2005, when ABC took over management of Stargel Stadium. From there, the partnership strengthened and expanded, allowing both entities to do what they do best. For CPS that meant focusing on educating Cincinnati children, and for ABC, it meant focusing on extracurricular programming.

The ABC-CPS partnership now includes a variety of programs, including management of high school and junior high athletic budgets at 13 schools, management of Community Learning Centers at six schools, Fun at Bat and the CPS Athletic Hall of Fame.

ABC and CPS are united in a partnership with a common goal of providing the children of Cincinnati Public Schools the best resources and opportunities possible, whether that’s in or beyond the classroom.

Community Learning Centers

CPS Community Learning Centers (CLCs) serve as hubs for a range of community services and provide a system of integrated partnerships that promote academic excellence and offer recreational, educational, social, health, civic, and cultural opportunities for students, families, and the community. In 2017-2018, ABC served as lead agency for six CLCs in Aiken High School, Roselawn Condon, Silverton Paideia Academy, Winton Hills Academy, College Hill Fundamental Academy, and Frederick Douglass Elementary.
CPS Athletic Hall of Fame

The CPS Athletic Hall of Fame commemorates the heritage, spirit and significance of interscholastic sports, and the coaches and athletes who have contributed to the athletic programs at CPS high schools. Every year, ABC hosts the Hall of Fame induction ceremony at Paul Brown Stadium, where 300 people come together to celebrate the rich athletic history of CPS schools.

Fun at Bat

During the year, ABC and CPS partnered with the Reds Community Fund to bring the Fun at Bat program to eight elementary schools in the district. This bat and ball, entry level program has an emphasis on character development, functional movement, active play and fun.

High School & Junior High Athletics

ABC partners with CPS to administer the athletics purchasing budgets for grades 7-12 at thirteen CPS high schools. ABC provides nine full-time Extracurricular/Athletic Directors to oversee their school’s on-site activities and needs. Each school’s athletic fund is used to pay for equipment, uniforms, officials, transportation, security, and more.

leadership
More activities, less overhead

Anybody who has been involved in a nonprofit knows that with the joy of filling a community’s need comes the pain of nonprofit management. ABC helps alleviate that pain for many organizations in the Cincinnati area that deliver programming to CPS schools.

By acting as the fiscal agent for partners, and by providing nonprofit mentorship and guidance, ABC ensures that partners can maximize the amount of programming they deliver to CPS students while minimizing overhead.

ABC manages nearly 200 funds for partners, and works in concert with these partners to deliver programming as effectively and efficiently as possible.

Benjamin Carlson-Berne Fund

Ben Carlson-Berne loved classical music, and studied it fervently at the School for Creative and Performing Arts. Before his tragic death in 2002 at the age of 19, he developed a service project to bring classical music into underserved Cincinnati communities. After his death, his parents created a memorial fund in their son’s name that provides funding for music education in CPS schools.
**Cincinnati Architecture Mentoring Program**

The Cincinnati Architecture Mentoring Program (CAMP) seeks to improve diversity in the field of architecture. CAMP formed in 2006 as a collaborative effort between DAAP School of Architecture and Interior Design (SAID), the American Institute of Architects, and the National Organization of Minority Architects. The program includes a low-cost week-long summer program that offers 8th and 9th graders the chance to explore the creative process of designing buildings through hands-on projects incorporating drawing techniques and model building.

**Julie Henderson Fund**

For kids, taking regular trips to the zoo is a great way to see and learn all about animals. But what about kids who have disabilities that make traveling or being in foreign environments too difficult to handle? Since 2008, the Henderson Fund seeks to address this very problem. Created by Julie Henderson, a retired Cincinnati Public Schools teacher, the fund was established with the goal of introducing special needs children to animals in their own classrooms.

**Rothenberg Rooftop Garden**

You would never know it driving by, but at the top of Rothenberg Preparatory Academy is an outdoor classroom that integrates math, science, and language arts with hands-on garden-based lessons. ABC’s fiscal sponsorship of the Garden allows its employees to focus on helping children develop critical thinking skills while fostering stewardship of their surroundings and community, without having to focus on the back-end administration that comes with running an organization.

**Fourthwall Youth Studios**

At Fourthwall Youth Studios, a filmmaking and digital media program for youth in junior high and high school, they believe that intelligence comes in many forms, and grades are not the only barometer for success. ABC provides support that helps Fourthwall offer teens at five CPS high schools an alternative path to success through film production and digital media, providing 21st century skill development, a portfolio, afterschool jobs, a network, and college and career guidance.

**Booster Clubs**

Schools host car washes, bake sales, and spaghetti dinners… but then what do they do with their hard-earned money? Many turn to ABC, where over 150 separate accounts are managed for various school funds, including athletics, cultural, special event, tutoring, volunteer, and arts funds. ABC’s role eliminates the need for each individual school to create a nonprofit, manage a bank account, and file taxes, enabling the schools to provide more and better programming with the money they raise.
Active collaboration

Strong partnerships for strong programs

Partnerships and active collaboration are at the heart of every ABC program. Thanks to the generosity and energy of the Greater Cincinnati community, ABC and its partners are able to pool resources and talent for the benefit of CPS children. Partners provide a wide variety of important resources, such as expertise and training, activity venues, program supplies, and financial support. Simply put, we could not do what we do without our partners.

Here are just a few examples of our strong partnerships throughout the city:

Cincinnati Children’s Division of Sports Medicine

Medical Care for Athletes

When an athlete gets injured during a game, who are those people that run out to help? At CPS high school games, one of them is a sports medicine doctor from Cincinnati Children’s Hospital. In partnership with ABC and CPS, Cincinnati Children’s provides a sports medicine doctor for almost every sporting event, including football, basketball, soccer, volleyball, baseball, and softball games, as well as track and wrestling meets. Not only that, Children’s also donated over $650,000 in time and equipment for athletic training services for each of the athletic departments of nearly all CPS high schools. Through their work with ABC and the athletic program, Cincinnati Children’s is making sure that high school athletes train properly and stay safe on the field.

The results of the partnership during 2017-2018 include:

- Cincinnati Children’s provided 4,179 sports medicine injury encounters at the school or on the sideline, at no cost
- Cincinnati Children’s donated 126 physician hours for sport event coverage and sports medicine clinics at school, an in-kind gift of $28,453
- Cincinnati Children’s provided Athletic Trainers and their services, at no cost, totaling $652,243
  - This includes $325,523 in modalities and rehabilitation/treatment cost and $326,720 in Athletic Trainer time
- Cincinnati Children’s absorbed the cost and expertise to implement and maintain telehealth program at Hughes, Taft, and Western Hills to make sports medicine physician access easier for students without transportation to clinics
Cincinnati Reds Community Fund

Baseball for Every Age

If it’s a baseball or softball program in Cincinnati Public Schools, odds are the Reds Community Fund helped make it possible. The Reds Community Fund has been a strong partner of ABC for many years, providing funding and support for all high school girls softball and boys baseball in CPS. During the past two years, the Reds Community Fund amped up their support and began partnering with ABC to provide junior high softball and baseball as well. Most recently, the Community Fund helped ABC and CPS launch USA Baseball’s “Fun At Bat” — an introductory program aimed at teaching baseball fundamentals and character lessons – to elementary schools.

On top of the Fund’s direct support of baseball and softball in the schools, in 2014 it also celebrated the opening of the 33,000-square-foot Joey Votto Training Center, which provides free community and outreach programs to all CPS students.

Cincinnati Bengals / NFL

Revitalizing Playing Fields

In 2017, ABC worked with the Cincinnati Bengals and NFL Foundation to secure a $250,000 donation towards the redevelopment of the South Avondale Elementary playing field. This is the third field under this partnership, with new Withrow and Woodward fields in 2007 and 2011. In addition, the Cincinnati Bengals annually support a variety of other important initiatives with ABC and with specific CPS high schools, such as purchasing uniforms and helmets.

Cincinnati Police Department

Steer Clear and the AAA School Safety Patrol Programs

The Cincinnati Police Department (CPD) provides training and support for two ABC programs: AAA School Safety Patrol and Steer Clear. For Safety Patrol, officers visit every participating school (up to 26 schools) and teach the students how to help keep other children safe, including lessons on monitoring exit doors and hallways. CPD also provides financial support that allows ABC to deliver the Steer Clear program (drug and alcohol prevention education) to over 1,000 4th-6th graders.

Legal Aid Society and Hamilton County Job & Family Services

Kids in School Rule! (KISR!)

Launched in 2008 and implemented in all CPS schools in 2012, the Kids in School Rule! (KISR!) program is aimed at supporting some of CPS’s most vulnerable children — those living in foster care. Working with Legal Aid Society of Greater Cincinnati and Hamilton County Job and Family Services, ABC provides a full-time enrichment coordinator who focuses on helping foster children maintain consistent participation in activities of their choice.
ABC by the numbers

2017-2018 financial breakdown

Activities Beyond the Classroom spends 88 cents of every dollar on extracurriculars, providing programs that are both effective and efficient.

Make giving your activity

Work, Wisdom and Wealth are three ways you can get active with ABC and support the children of Cincinnati Public Schools.

Work
Sign yourself up to volunteer at an ABC program, or contact us about getting your company’s volunteer program engaged with ABC.

Wisdom
Utilize your existing expertise and programs by partnering with ABC to deliver your services in CPS schools.

Wealth
Donate to ABC, and help us reach our goal of serving ALL CPS students in the future. Ask your company about matching gifts or sponsorship programs.

Contact us to see how you can get active with ABC
